
Statement of Exclusion – SECFx

With respect to ATEX Directive 2014/34/EU

We,

Goudsmit Magnetic Systems B.V.
Petunialaan 19
5582 HA Waalre
The Netherlands

herewith declare, on our own responsibility, that the equipment:

Article description: **Cleanflow Magnet SECFx without add-on components installed...**

is outside the scope of ATEX Directive 2014/34/EU.

The basic product, without additional components installed, does not have any moving parts other than manually operated slow moving parts. There are no electrical circuits or other parts that would provide effective ignition source under normal operation, expected malfunction or rare malfunction. The device is therefore out of scope of the ATEX directive 2014/34/EU. Hence the equipment will get no EX-marking and can be safely used in ATEX dust zones 21 and 22 and gas zones 1 and 2.

If one or more ATEX certified add-on components are installed on the outside of the equipment, then the outside of the product chute will be suited for use in the ATEX zones corresponding with the resulting ATEX category of the added components.

In case Goudsmit installed the add-on components we have assessed and determined that the mounting of the these components did not introduce new ignition sources. If other parties mount components onto the equipment they should perform a risk assessment and determine that no new ignition sources are introduced.

Waalre, The Netherlands, 19-5-2016
